

# HOW TO CONNECT

Altruist

Quicken

## 01 - Log in via a web browser

(such as Chrome) rather than using the Quicken mobile app.

## 02 - Select the Altruist integration

You should see two Altruist options — please choose the one with the **Altruist logo**.

**Below is a screenshot of the correct Altruist option**

## 03 - Each primary account holder must connect their own account

This is by design, so third parties cannot access your account data. Each person in your household will likely need to log in and connect the accounts for which they are the primary owner.
